

Corrected Paragraph 1, S.N. 10/645,783

Michael Hardy

Field of the Invention

- 1        This invention is directed to the field of a solids retention screen for removable use with a vessel, such as a drinking vessel ~~[of]~~ or cooking vessel, to allow, for example, drinking without interference with ice, i.e. crushed or cubes, or draining hot water from a cooking vessel without the need for a separate colander.
